April 2, 2025

EVELYN R. FETALVERO, CESO IV

Regional Director

Department of Education – Regional Office VIII

Dear Director Fetalvero,

Greetings of peace and good health!

Pediatric Chronic Kidney Disease (CKD) significantly affects children globally and is associated with significant morbidity as well as increased cardiovascular and all-cause mortality. It can be asymptomatic until it progresses to advanced stages, leading to underestimates of incidence and prevalence.

Last October 29-30, 2024, the Department of Health-Eastern Visayas Center for Health Development (DOH-EV CHD) conducted a **Chronic Kidney Disease (CKD) Prevalence Orientation** to pre-identified municipalities and cities with increasing cases of CKD. As per the agreement from this activity, a screening study will be done among school age children, Grades 1 to 3, in a particular elementary school of each municipality and city.

In relation to this, may we ask your office to facilitate the invitation of the School Principals or their representatives in the following Central Schools to attend an **Orientation on Chronic Kidney Disease (CKD) Screening Study on April 22-23, 2025 in Tacloban City**. The exact venue will be announced at a later date.

LEYTE

1. Palo Central School
2. Baybay I Central School
3. Babatngon Central School
4. Dagami North Central School
5. Inopacan Central School

SOUTHERN LEYTE

1. Maasin Central School
