Dear Ma'am/Sir,

Greetings!

ACTSAFE Health and Environmental Corp., a DOLE-OSHC Accredited Safety Training Organization, will be conducting an **Online 48-Hour Safety and Health Program Audit and Occupational Health and Safety Management System (OHSMS) Training for Safety Officer 4 (SO4)**.

We invite interested participants to join this training program to enhance their knowledge and competencies in occupational safety and health management and compliance.

Safety and Health Program Audit (SHPA)
A Safety and Health Program Audit is a systematic evaluation of an organization's safety and health programs to determine if they are properly implemented, effective, and compliant with applicable laws and standards (such as DOLE OSH requirements). It identifies gaps, risks, and areas for improvement to ensure a safe workplace.

Occupational Health and Safety Management System (OHSMS)
An Occupational Health and Safety Management System is a structured framework used by an organization to manage workplace health and safety risks. It includes policies, procedures, processes, and responsibilities aimed at preventing work-related injuries, illnesses, and hazards, while continuously improving safety performance.

In simple terms:
- SHPA = checking and evaluating the safety program
- OHSMS = the full system used to manage workplace safety and health

Training Fee: ₱4,500.00
Training Schedule: November 23–27, 2026 (Monday–Friday | 8:00 AM–5:00 PM)

Training Requirements:
- Valid SO2 Certificate
- SO3 Certificate

October 14, 2026

Dearest Ma'am/Sir,

Greetings!

The ACTSAFE, Health and Environmental Corp., a DOLE-OSHC Accredited Safety Training Organization, will conduct an approved online Safety Officer 3 (SO3) Training, featuring the special course on Loss Control Management (LCM) and Hazard Identification, Risk Assessment, and Control (HIRAC).

The training is scheduled on **November 16–20, 2026** (Monday to Friday), from 8:00 AM to 5:00 PM, and will be conducted via Zoom Pro Webinar.

About the Course:

Loss Control Management (LCM) involves the combination of the likelihood and consequence of risks. To fully understand risk, key terms such as hazard, hazardous, likelihood, and consequence must be clearly defined.

- A **hazard** is anything with the potential to cause harm.
- For harm to occur, a **hazardous event** must take place.
- **Likelihood** measures the chance of a hazardous event happening.
- **Consequence** refers to the outcome of the hazardous event.

Unsafe acts and conditions, which lead to exposure to hazards, are common causes of accidents. These accidents cannot be effectively eliminated without conducting a **risk assessment**. This process involves carefully examining and evaluating elements in the environment that could cause injury or ill health. Once hazards are identified, **suitable and sufficient control measures** must be implemented. The best way to control a hazard is to address it at its source.

Training Details:

- **Course:** LOSS CONTROL MANAGEMENT (LCM) + HAZARD IDENTIFICATION RISK ASSESSMENT & CONTROL (HIRAC)
- **Platform:** Webinar (Zoom Pro Class)
- **Exclusivity:** For General Industries and Construction
- **Training Fee:** P4,500.00
- **Covers:** Training Certificate, Training Manual (electronic copy), receipt and **ID** (freebie)
